PROJECTS

Data Cleaning in python: Did a data cleaning project and analysis on python which involves the use of movies dataset using the pandas, numpy, matplotlib, seaborn and sci-kit learn libraries. It showed a strong co-relation between the movie's gross income and with other features such as Actors, Budget etc.

SQL Covid-19 Analysis: leveraged the **advance SQL Queries** such as partition by and other advance queries to perform deep Analysis on Covid-19 vaccination, infection and death rates which reveled many interesting trends.

Covid-19 Tableau Analysis: Using the data retrieved via SQL created a dashboard to visualize that Covid-19 data. This includes world map of infection rates, death rate across the continents, death rate by year and other such graphs.

Bank Stock Data Analysis - Using the Alpha Advantage API fetched the top bank stock market data to EDA using interactive graphs plotly and cufflinks to check the percent increase in these bank stocks and it revealed **fascinating progression**.

Predict Future Sales Data: This project involved prediction of total sales for every product and store in the next month. The data was cleaned and prepared the data for further data analysis and machine learning. The results were **within 2\$ of margin** of error as compared to test data.
